BC I/II Learning Targets (28, 14 core)

Level	*Integration Techniques, Part II* (7, 3 core)
	I.6: I can evaluate integrals by trig substitution.
	I.7: I can evaluate integrals by partial fractions.
	I.8: **(Core)** I can evaluate a definite integral as the limit of a Riemann sum.
	I.9: **(Core)** I can approximate a definite integral using the left-endpoint, right-endpoint, midpoint, trapezoidal, and Simpson's rules.
	I.10: I can determine the maximum absolute error in the approximations in 1.9, and determine the number of terms in the Riemann sum needed to keep the maximum error under a given threshold.
	I.11: **(Core)** I can calculate improper integrals using the definition.
	I.12: I can determine whether a given improper integral converges using the comparison test and the limit comparison tests.
Level	***Applications of Integration** (6, 3 core)*
	IA.1: **(Core)** I can find the area between two curves.
	IA.2: **(Core)** I can find the volume of a solid of revolution using the disk method.
	IA.3: I can find the volume of a solid of revolution with a hollow cavity using the washer method.
	IA.4: I can find the volume of a solid of revolution with a hollow cavity using the method of cylindrical shells.
	IA.5: I can find the surface area of a solid of revolution.
	IA.6: **(Core)** I can find the arc length of a curve.
Level	***Differential Equations** (4, 1 core)*
	DE.1: I can find a slope field and use it to sketch an approximate solution curve.
	DE.2: I can use Euler's method to find a piecewise linear approximation to the solution of a differential equation.
	DE.3: **(Core)** I can solve a separable differential equation.
	DE.4: I can use differential equations to model exponential and logistic growth.
Level	***Sequences and Series** (6, 4 core)*
	S.1: I can determine when a given geometric or telescoping series converges and I can find the sum. I can use geometric series to convert a repeating decimal to a ratio of integers.
	S.2: **(Core)** I can use the nth term Test for Divergence to prove that a divergent sequence diverges.
	S.3: **(Core)** I can use the Integral Test to determine whether a given series converges or diverges
	S.4: **(Core)** I can use the Alternating Series Test to determine whether a given alternating series converges.
	S.5: I can use the Alternating Series Error Theorem to estimate an alternating series to any desired accuracy.
	S.6: (**Core)** I can use the Ratio Test to determine whether a given series converges absolutely.

Level	*Power Series (5, 3 core)*
	PS.1: **(Core)** I can use the Ratio Test to find the interval of convergence of a given power series.
	PS.2: I can write a given function as a power series by manipulating the geometric series formula can differentiate and integrate a power series.
	PS.3: **(Core)** I can write the Maclaurin series of a given function by using a known Macluarin serie and performing appropriate operations on series (multiplying by a constant, integrating, or differentiating).
	PS.4: **(Core)** I can approximate an analytic function by a Taylor polynomial within a specified erro
	PS.5: I can write the Taylor series of a function using the definition of a Taylor series.

Grading

Assessments
Each assessment will cover 1-4 learning targets, and will be announced in advance. Each learning target will receive one of the following scores out of 4:

4: Mastered
3: Nearing mastery
2: Proficient
1: Nearing proficiency
0: Beginning

Final Letter Grade Determination

Letter Grade	All core met at 2 or higher	Total Score	Sum of Scores ($\geq$ 2)	Sum of Scores ($\geq$ 3)	Sum of Scores (4)	POTWs	WebWork
A	Yes	$\geq$ 98	-	-	$\geq$ 72	$\geq$ 85%	$\geq$ 90%
B	Yes	$\geq$ 84	-	$\geq$ 49	-	$\geq$ 75%	$\geq$ 80%
C	Yes	$\geq$ 70	$\geq$ 42	$\geq$ 14	-	$\geq$ 60%	$\geq$ 70%
C-	Yes	$\geq$ 56	$\geq$ 28	$\geq$ 7	-	$\geq$ 50%	$\geq$ 60%

- If *all* requirements for a grade of C- are not met, then a grade of D will be assigned.
- If all but one of the requirements in the next row are met *or* the final exam score is 85% or above, then a final letter grade of C or B will be augmented with a '+'.
- If the final exam score is below 50%, then a final letter grade of C, B, or A will be augmented with a '-', while a final letter grade of C+ or B+ will be lowered to C or B, respectively.
