BC I/II Learning Targets (28, 17 core)

L1	L2	
		Limits (5, 3 core)
❑	❑	L.1: **(Core)** I can find the limit of a function at a point.
❑	❑	L.2: **(Core)** I can compute limits at infinity, infinite limits, and one-sided limits.
❑	❑	L.3: **(Core)** I can determine where a function is continuous, and I can classify discontinuities.
❑	❑	L.4: I can find limits using the squeeze theorem.
❑	❑	L.5 I can apply the Intermediate Value Theorem to draw conclusions about functions.
❑	❑	L.6: I can identify limits in indeterminate form and use L'Hopital's Rule to evaluate them.
L1	**L2**	***Derivatives (3, 2 core)***
❑	❑	D.1: **(Core)** I can find the derivative of a function using the definition of the derivative.
❑	❑	D.2: **(Core)** I can find the equation of the tangent line to a function at a point and use it to estimate nearby points.
❑	❑	D.3: I can estimate the value of a derivative from given data, state its units, and give its meaning.
L1	**L2**	***Derivative Calculations (6, 3 core)***
❑	❑	DC.1: **(Core)** I can compute derivatives of polynomial, exponential, sine, and cosine functions, basic combinations of these (constant multiples, sums, differences).
❑	❑	DC.2a: **(Core)** I can compute derivatives of products of functions.
❑	❑	DC.2b: **(Core)** I can compute derivatives of quotients of functions.
❑	❑	DC.2c: **(Core)** I can compute derivatives of compositions of functions.
❑	❑	DC.3: **(Core)** I can calculate higher-order derivatives of a function.
❑	❑	DC.4: I can compute derivatives using multiple derivative rules in combination.
❑	❑	DC.5: I can compute derivatives of logarithmic, trigonometric, and inverse trig functions.
❑	❑	DC.6: I can compute the derivative of an implicitly-defined function and find the equation of the tangent line to an implicit curve at a given point.
L1	**L2**	***Derivative Applications (6, 4 core)***
❑	❑	DA.1: **(Core)** I can use the First and Second Derivative Tests to classify critical points.
❑	❑	DA.2: **(Core)** I can use the Extreme Value Theorem to find global extrema.
❑	❑	DA.3: **(Core)** I can use derivatives to graph a function.
❑	❑	DA.4: **(Core)** I can use derivatives to solve optimization problems.
❑	❑	DA.5: I can use the Mean Value Theorem to justify conclusions about a function.
❑	❑	DA.6: I can solve related rates problems.

L1	L2	*Integration Techniques, Part I (5, 3 core)*
❑	❑	I.1: **(Core)** I can compute integrals of polynomial, exponential, sine, and cosine functions, basic combinations of these (constant multiples, sums, differences).
❑	❑	I.2: **(Core)** I can compute integrals using substitution.
❑	❑	I.3: **(Core)** I can compute integrals using integration by parts.
❑	❑	I.4: I can apply trigonometric identities to compute trig integrals.
❑	❑	I.5: I can apply the Fundamental Theorem of Calculus.

Grade Record

A ❑	Meet **5 more** standards at Level 2 **(25 total)**: ❑ ❑ ❑ ❑ ❑ Meet **5 more** standards at Level 1 **(28 total)**: ❑ ❑ ❑ ❑ ❑ Earn 90% of the points on Problem Sets : ❑ Earn "Excellent" on Portfolio: ❑
B ❑	Meet **8 more** standards at Level 2 **(20 total)**: ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ Meet **2 more** standards at Level 1 **(23 total)**: ❑ ❑ Earn 80% of the points on Problem Sets : ❑ Earn "Meets Expectations" on Portfolio: ❑
C ❑	Meet **5 more** standards at Level 2 **(12 total)**: ❑ ❑ ❑ ❑ ❑ Meet **3 more** standards at Level 1 **(21 total)**: ❑ ❑ ❑ Earn 70% of the points on Problem Sets : ❑
C- ❑	Meet **7** standards at Level 2: ❑ ❑ ❑ ❑ ❑ ❑ ❑ Meet **18** standards at Level 1: ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ ❑ Earn 60% of the points on Problem Sets : ❑

- **If *all* requirements for a grade of C- are not met, then a grade of D will be assigned.**
- **If 3/4 of the requirements in the next row are met *or* the final exam score is 85% or above, then a final letter grade of C or B will be augmented with a '+'.**
- **If the final exam score is below 50%, then a final letter grade of C or B will be augmented with a '-', while a final letter grade of C+ or B+ will be lowered to C or B, respectively.**
